StripLights

**Modular
Light
Shaping
Tools**

**“My job is to make people
beautiful, and the Profoto
StripLights are one of my
most essential tools.”**

—Matthew Jordan Smith

“Everywhere I go - it’s Profoto. When I shoot on location, I always rent a studio and lights. Those lights are always Profoto. If it isn’t available, I’ll bring my own. Being a beauty photographer, it’s definitely always about having fantastic light. I can take anybody and make them look beautiful with the right light. I spend a lot of time making sure the light is just right on every shot.

I love the Profoto Striplites because they have one long, single flashtube and barn doors on both sides to control the light. Even when I put this light up very close, it’s even, it’s beautiful. For me, it’s always all about the light.”

- Matthew Jordan Smith

StripLight S, M and L

The rigid and stable strip lights come in three sizes 28", 51" or 75" long and 4" wide. They all have proportional modelling lights and optional barn doors for stray light control. A creative tool for beauty, people, still life, car and furniture photography. Create sharp outlines and soft edge shadows. Also nicely suited for background illumination and to accentuate structures.

The strip lights are extremely even with no visible light fall-off and they are stackable. They have an integrated stand adapter and can as an option be used with a clear front cover for faster light fall-off and more character. Depending on the size of the strip light they come with 1,2 or 3 flash tubes each having its own power cable for connection to the flash generator and this makes it possible to allow distinctive graduation control on the M or L strip light.

Stackable to create a longer strip light. Delivered with an integrated stand adapter.

Max energy 4800Ws/flashtube ie. 14,400Ws on the StripLight L.

StripLight S	
Cat# 501-211	Int'l# (10 07 35)
StripLight M	
Cat# 501-212	Int'l# (10 07 36)
StripLight L	
Cat# 501-213	Int'l# (10 07 30)
